DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Beusse on 12/07/2004.

The application has been amended as follows:

Amend Claim 13, to include after the last paragraph

--f. evaluating the pattern of said emitted electrons to determine whether said first conducting component has electrical continuity with said second conducting component.--

In the specification add --30-- after "insulating material" at line 5 of paragraph 0030 (see page 10).

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: add element 30 to the fig. 1 as shown (attached herewith). In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Amendment to claim 13 was made to add the allowable subject matter. Also, apparatus of claim 13 as amended is used for methods of claims 1 and 7.

Allowable Subject Matter

Claims 1-18 have been allowed.

The following is an examiner's statement of reasons for allowance: No prior art has been found to meet the limitation of claims 1-18 calling for a method and system comprising: providing alternating pulsing using first and second charge particle sources to first and second conducting component of integrated circuit respectively; evaluating the pattern of a secondary (emitted for claim 13) electrons to determine whether first conducting component has electrical continuity with said second conducting component, as further defined at claims 1, 7 and 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Examiner made a call to Mr. Beusse on 12/01/2004 for restriction requirement between two Groups (apparatus and method). Mr. Beusse elected Group I (methods, claims 1-12) with traverse. After Examining and searching, Examiner called the Mr. Beusse on 12/07/2004 to rejoined the claims 13-18 (apparatus, Group II) with amendment as mentioned above to allow the application as whole.
